

Climate Change Schools Project

We are a lead school with the Climate Change Schools Project having been involved since the very beginning of the initiative, when two of our staff liaised with staff from other schools to create the original teaching materials.

Very simply we encourage our children to appreciate and become familiar not only with their own locality, but also the wider world. We try to develop in them a sense of ownership and responsibility so that they will want to care for their environment, realising that...*'No-one can do everything, but everyone can do something'* in order to achieve sustainability and help our planet to be a healthy place.

Our aim wherever possible, is to embed this teaching into our everyday practice.
